

RURAL - GREEN CROPS USING GREEN POWER

“We were paying around \$3,000 a month for power, now our bills are often under \$300 thanks to Innolec. They installed a 49kW system with 50kWh of storage and made it work despite the tough conditions and a 200m trench. No complaints, just results — and it was all up and running within a few days.” – Farm Owner, Central QLD

Fast Facts:

System Size: 49.0kW

Carbon offset: 58.7T

Bill Reduction for Daytime usage: 100%
